ABOUT

Web Developer with 7 years of experience building and maintaining web applications using JavaScript, React, PHP, SQL, HTML/CSS, and WordPress. Knowledgeable in custom application development, UX/UI best practices, and version control with Git. Experienced in optimizing website performance through caching, code refactoring, and image optimization, improving load times and SEO rankings. Adept at collaborating with clients, troubleshooting issues, and delivering accessible, user-focused solutions.

EXPERIENCE

Neuger Communications Group/ Web Developer
July 2021 - September 2025 | Minneapolis, MN

- Developed and implemented custom WordPress themes and Gutenberg blocks using PHP, HTML, Sass, ACF, and Twig.
- Developed REST API endpoints and React/PHP applications, enhancing site interactivity and performance.
- Conducted site security assessments, addressing plugin/theme vulnerabilities with stronger authentication, input validation, and SSL.
- Collaborated with teams to ensure sites adhered to WCAG guidelines and provided inclusive user experiences.

Freelance Web Developer
March 2019 - July 2021 | Eau Claire, WI

- Designed and developed custom WordPress CMS websites tailored to the client's needs.
- Configured DNS, hosting environments, and MySQL databases; ensured secure and efficient deployments.
- Produced visual assets, including logos and custom graphics, to support branding efforts.

Satellite Six LLC / Support Developer
August 2017 - December 2018 | Eau Claire, WI

- Provided customer support and troubleshooting for client websites, ensuring rapid issue resolution.
- Customized themes and plugins with PHP, HTML, CSS, and SQL, enhancing functionality and usability.
- Translated static designs into responsive, interactive templates using ACF and CMS frameworks.
